

In recent days Consell de Formentera cleaning crews have disinfected inner patio spaces and the exterior of the island's adult care centre. Though personnel have begun returning to work, the Centre de Dia remains closed to the public, and islanders who normally get care there are currently benefitting from at-home and over-the-phone assistance from Formentera social services staff.

At present the local government's cleaning team is still engaged in special operations to disinfect and pressure-wash high-traffic spots in the main towns of the island.
