

Today individuals in the disability unit of the Formentera Day Centre concluded summer activities with a swim in a swimming pool adapted for people with reduced mobility and a breakfast at Hotel Tahití.

Formentera's adult day care centre typically proposes outdoor activities, notably in summer, when weather and other conditions allow for a wider range of activities. To cap this season, the hotel treated participants to a buffet breakfast and a morning at the hotel's facilities, which include a swimming pool adapted for people with reduced mobility.

The owners of Hotel Tahití built the pool to offer obstacle-free swimming to their nephew Toni. Toni, who had reduced mobility, also attended the Formentera Day Centre for many years. The Formentera Office of Social Welfare applaud the hotel's collaboration in enabling day centre users to enjoy this special day.
